UK Disabilities: Personal Independence Payment Program Analysis of New Claims by Body System & Underlying Cause

Phinance Technologies' analysis of disabilities in the UK is based on investigation of the Personal Independence Payment (PIP) program by the Department of Work and Pensions (DWP). Our interactive charts allow individuals, researchers and institutions to visualize data and make their own conclusions based upon what they observe.

Humanity Projects

We provide separate analyses and interactive data charts of PIP Clearances (New Claims) by Body Systems and Underlying Causes. Both monthly & yearly data are available for analysis.

[VIEW DATA >](#)

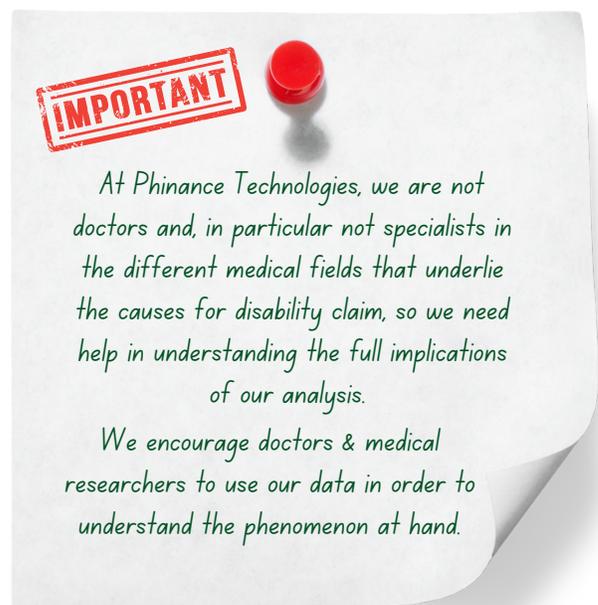

Body Systems:

This provides an examination of the changes in disabilities in the UK (PIP claims) by the different body system classification that are associated to the underlying cause for the claim.

[VIEW DATA >](#)

Underlying Causes:

This provides an examination of the changes in disabilities in the UK (PIP claims) by underlying cause and for different population age groups.

They can't run from this data!

Disastrous Global Health Implications

From increased neuropathies, cardiac failure or aneurisms, to auditory problems and even the strange rapid increase in adult autism, the data has clues to help all health practitioners to provide a better service to their patients.
