Did you know that the CV does not prevent transmission of the virus, severe Covid-19 symptoms, or death?

“None of the trials currently under way are designed to detect a reduction in any serious outcome such as hospital admissions, use of intensive care, or deaths. Nor are the vaccines being studied to determine whether they can interrupt transmission of the virus.” <https://bit.ly/2VqSSjts>

Did you know that the impact of the Covid vaccine on fertility, pregnancy and lactation is UNKNOWN?

Former Pfizer researcher Dr. Michael Yeadon and German physician and politician Dr. Wolfgang Wodarg, question the impact on fertility in their [43-page petition](https://bit.ly/33Oiiw6) to the European Medicines Agency.

Directly from the Pfizer Covid-19 package insert only seen by doctors:

4.6 Fertility, pregnancy and lactation

Pregnancy

There are no or limited amount of data from the use of COVID-19 mRNA Vaccine BNT162b2. Animal reproductive toxicity studies have not been completed. COVID-19 mRNA Vaccine BNT162b2 is not recommended during pregnancy. For women of childbearing age, pregnancy should be excluded before vaccination. In addition, women of childbearing age should be advised to avoid pregnancy for at least 2 months after their second dose.

Breast-feeding

It is unknown whether COVID-19 mRNA Vaccine BNT162b2 is excreted in human milk. A risk to the newborns/infants cannot be excluded. COVID-19 mRNA Vaccine BNT162b2 should not be used during breast-feeding.

Fertility

It is unknown whether COVID-19 mRNA Vaccine BNT162b2 has an impact on fertility.

Did you know that the frontrunner Pfizer Covid Vaccine requires -60 Degrees C to -90 Degrees C for storage to keep the mRNA coating stable? Did you know that the Moderna Covid Vaccines requires -20 Degrees C for storage?

What happens if the vaccine that you receive hasn't been stored properly at some point from shipping to administration? A Will the vaccine be viable if temperatures are not maintained? What side effects can be expected? Who is responsible?

Did you know that after 70 years of research, we have a flu shot that is at best 40% effective...so how are we supposed to trust that after a few months, we have a Covid vaccine that is over 90% effective?

Did you know that there are many well-known researchers with concerns about how the vaccine trial designs were constructed? <https://bit.ly/39NGMsQ>

Did you know that four of the leading developers of coronavirus vaccines are convicted serial felons? According to environmental attorney and Children's Health Defense founder Robert F. Kennedy, Jr., "in the past 10 years, **GlaxoSmithKline, Sanofi, Pfizer, and Merck** have paid \$35 Billion dollars in criminal penalties, damages, fines, for lying to doctors, for defrauding science, for falsifying science, for killing hundreds of thousands of Americans knowingly." <https://bit.ly/371JkGh>

Did you know that past unsuccessful attempts to develop Coronavirus vaccines always hit the same roadblock – Pathogenic Priming?

Pathogenic priming is vaccine-induced antibody production that, after exposure to virus (post-vaccination) stimulates a very severe reaction to the virus (a hyperinflammatory response). This roadblock killed many research animals in past trials.

And now there is serious concern that the Covid vaccine is causing pathogenic priming in our seniors. <https://bit.ly/3qNuMhm>

Did you know that if you or a loved one has a bad reaction to the vaccine, no one is responsible; you cannot sue anyone?

In the Declaration, the Secretary determined that COVID-19 constitutes a health emergency and, through his authority under the PREP Act, provided liability immunity to all manufacturers, distributors, and other qualified persons engaged in the manufacture, testing, development, distribution, administration, and use of any covered countermeasures.) <https://bit.ly/33Ucllq>

Did you know that, even though the U.S. federal government has no say about whether or not this vaccine is mandatory, your state has the right to make them mandatory. So does your employer. And many private companies. And health care facilities. And schools. And public transportation...
